Art Unit: 2614

## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a digital television receiver. Each independent claim identifies the uniquely distinct features: "an antenna switching control section for switching the patterns of the antenna during a sync signal period of the received channel signal if the control signal is generated". The closest prior art, Jeong et al. (US Patent No. 6,334,218 B1) disclose device for receiving satellite broadcast and a receiver comprises an antenna, a tuner, a modulator, a FEC decoder, a microprocessor, and an antenna driver, and Anderson (US Patent No. 5,797,083) discloses self-aligning satellite receiver antenna for measuring a signal strength from the satellite and issuing commands based on the measurement, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trang U. Tran whose telephone number is (703) 305-0090. The examiner can normally be reached on 8:00 AM - 5:30 PM, Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (703) 305-4795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
